POLICY STATEMENT

As a company we recognise and accept the need to manage our impact on the environment and are committed to meeting clients' expectations for an environmentally sound service throughout the Utility Sector.

Care for the environment is a consistent factor of our operations, as well as the benchmark of our daily work. All activities are carried out regarding the limits that nature can accept in the form of resource consumption and pollution. Our commitment to protecting the natural environment is only achievable through a whole business approach, all employees, contractors, and suppliers need to actively work towards minimising our impact on the environment.

To achieve this, the company is committed to:

- Complying with the requirements of current applicable environmental legislation.
- Setting and reviewing objectives and targets to ensure continual improvement.
- Seeking to reduce consumption of materials and the minimisation of waste in all operations and promote reuse, recycling, and the use of recycled materials where practicable.
- Purchasing goods and equipment from suppliers who are committed to reducing their impact on the natural environment, assessed with our Supplier Assessment Form.
- Developing staff awareness of environmental issues through effective education and training, helping to ensure environmental protection measures are maintained and improved.
- Controlling, preventing, and seeking to minimise the level of emissions/pollution in all areas of the organisation.
- Continually improve our environmental element of our Health, Safety, and Environmental management system.
- Manage our business operations and activities to prevent pollution.
- Ensuring others who undertake work for the organisation, such as contractors, adhere to the environmental standards that CT Constructions holds itself and its works to.
- Monitoring progress and communicating environmental performance information as appropriate.
- Working closely with Clients to reflect their environmental concerns and requirements into existing practises.
- Communicating the policy to all company personnel and making it freely available to clients, the public, and other interested parties when requested.
- This document will be reviewed at a minimum annually and changes made from time to time in the light of new legislative requirements or organisational change.
